Ward PM. See Williams T.
Ware C. See Frankenfield S.
Williams T. Patient empowerment and ethical decision making: The patient/partner and the right to act, (3):100-104.
Williams T, Sims, J, Burkhead C, Ward PM. The creation, implementation, and evaluation of a nurse residency program through a shared leadership model in the intensive care setting, (4):154-161.

SUBJECT INDEX

Assessment
Early recognition of client status changes: The importance of time, (4):144.
Recognizing sport diving injuries, (1):26.

Cardiovascular
Atrial fibrillation: Beyond irregularly irregular, the basis for acute and chronic treatment, (5):180-189.
Atrio-ventricular nodal reentry tachycardia, (4):134.
Cardiogenic shock: A success story, (6):232.
Discovering meaning and purpose during recovery from an acute myocardial infarction, (1):36.
End points of resuscitation: Choosing the right parameters to monitor, (1):2.
Identifying inappropriate sinus tachycardia, (1):15.
Learning about catheter-directed thrombolysis: An aggressive treatment that can quickly resolve deep vein thrombosis, (3):91.
Off-pump coronary revascularization: Is it all that it's cracked up to be? (5):190-194.
Organizational considerations in the development of a new cardiovascular recovery unit, (5):195-200.
Post-myocardial infarction treatment in the older adult, (1):20.
Right ventricular myocardial infarction: When the power fails, (4):122.
SICU patients, (5):206-214.
Using evidence based practice to develop a protocol for postoperative-surgical intensive care unit patients (5):206-214.
Will my patient survive this cardiac arrest? (2):62.

Editorials
Attending national meetings: A potential cure for burnout, (5):223-224.
Episodes in nursing, (4):168.
Every nurse is a leader, (2):84.
I'm glad I'm a nurse, (6): 260.
Remembering...and finding that dreams can come true, (1):48.
The importance of certification, (3):120.

Education
A personal reflection: Whose rights are they anyway? (6):246.
High tech high touch: Mission possible? Creating an environment of healing, (5):201-205.
The creation, implementation and evaluation of a nurse residency program through a shared leadership model in the intensive care setting, (4):154.
You can help your clients change, (2):72.

Endocrine
Diabetes insipidus, (3):94.
Thyroid diseases: A primer for the critical care nurse, (4):127.
Treating nephrogenic diabetes insipidus: A case study, (3):98.

Families
Families of critically ill patients and the effect of nursing interventions, (2):64.

Gastrointestinal
An update on hepatitis, (5):170-179.
Unraveling the mystery of acute pancreatitis, (3):86.

Genetics
What nurses need to know about genetics, (2):50.

Leadership
Critical care nurses' role in code status discussion, (4):140.
Making outstandingly good presentations, (1):28.
Patient empowerment and ethical decision making: The patient/partner and the right to act, (3):100.

Neurologic
Assessing and managing patients with head injuries, (6):226.

Organ Donation
Critical care nurses' attitudes and knowledge related to organ donation, (6):249.

Pediatrics
Research abstracts, (1):35; (2):78; (3):111; (4):162; (5):216; (6):256.

Pulmonary
How to recognize and treat propellant inhalation, (1):18.

Research
Elements of an informed consent, (6):242.
Phases of a clinical trial, (4):152.
Research abstracts, (1):35; (2):78; (3):111; (4):162; (5):216, (6):256.

Sleep
Nature's nurse: Promoting sleep in the ICU, (1):32.

Violence
Recognition and prevention of hospital violence, (6):236.
